COURSES

Android 101,201,301,401-Swift 101,201

SUMMARY

I started Electrical and Electronics Engineering in 2011. In 2011, I successfully completed the English preparatory class. In 2013 I began to be interested in software. By the end of 2013, I started to make software as a profession with the enthusiasm that I won in the award of Turkcell Android Programming Competition. In 2015, I switched to the Computer Engineering department by leaving the Electrical Electronics department. I have about 6 years of mobile programming and design experience. Besides that, I play guitar and drums in a small band. I like to travel and take pictures. I can easily adapt to team work.
